

Disabling the NVIDIA Nouveau driver in Ubuntu 10.04

sometimes you might want to use the most current nvidia binary driver rather than the nouveau driver package.. or you want no driver at all for whatever reason, so you need to disable the pre-installed nouveau driver..

edit /etc/modprobe.d/blacklist-framebuffer.conf

make sure these two lines are in there:

```
blacklist nouveau  
blacklist nvidiafb
```

and reboot
