

SkyDemon on Linux (Ubuntu)

this is based on or copied from a [Post in the skydemon forums](#)

1. Install winetricks and wine

```
sudo apt-get install winetricks
```

(this will also install wine as a dependancy)

2. even though the above command installed winetricks, replace it with the newest version as download url's might have changed etc:

```
sudo wget http://winetricks.googlecode.com/svn/trunk/src/winetricks -O /usr/bin/winetricks
```

3. if you are running a **64bit Ubuntu version** you must install the 32bit libraries needed to run wine in 32bit mode first:

```
cd /tmp/  
wget https://raw.githubusercontent.com/spaetzlecode/getlibs/master/getlibs  
sudo chown root:root getlibs  
sudo chmod +x getlibs  
sudo mv -n getlibs /usr/local/bin  
sudo /usr/local/bin/getlibs -p gnome-keyring:i386  
sudo mkdir -p /usr/lib/i386-linux-gnu/pkcs11/  
sudo ln -s /usr/lib32/i386-linux-gnu/pkcs11/gnome-keyring-pkcs11.so  
/usr/lib/i386-linux-gnu/pkcs11/gnome-keyring-pkcs11.so
```

4. if you are running a **64bit Linux**, create a wine 32 bit prefix. i had some problems when i created a second prefix with 32bit.. since i don't need a 64 bit prefix anyway, i simply delted my .wine directory first

```
rm -rf /home/username/.wine
```

, and then recreated a 32bit prefix in .wine. (don't copy/paste, replace username with your user home directory name and use a direcotry other than .wine if .wine still exists and you want to keep your 64bit prefix. the directory must not exist yet!):

```
WINEPREFIX='/home/username/.wine' WINEARCH='win32' wine 'wineboot'
```

5. run

```
winecfg
```

and simply click OK when it pops up

6. run

```
winetricks dotnet30sp1
```

and follow the instructions (download the dotnet stuff and copy it to the folder they say.

7. now re-run the command

```
winetricks dotnet30sp1
```

which will now install dotnet 2.0. it will then ask you to download yet another file and place it in a folder it created for you. do just that and re-run

```
winetricks dotnet30sp1
```

8. run

```
winetricks gdiplus
```
