

pswiki

Welcome to my Wiki This is where i gather informations on how things can be done. I use this as a personal pastebin for me. So whenever i do something the first time and i am having a hard time finding out how to do it i note it down in here so i can always get back here and read how i did it the last time. since this might also be information that could help someone else out there i share this information on the web.

Disclaimer

i do of course take no responsibility for whatever happens after you follow my notes. use them at your own risk and be aware that maybe it never really worked. i'll usually note at the begining if it is an ongoing project or if it is something i never finished but this of course does not guarantee that everything else in here is a success :)
